Publicado online: abril 6, 2022 PDF Marco A. Melo; João. species (Malvaceae sensu lato) searching for new drug sources. Filgueiras How could historical chemical analyzes have confused iron minerals, either with copper or with cobalt minerals? Lima The determination of metals by ICP-OES in honey samples proved to be efficient in the application of this matrix as a bioindicator of geographic origin and environmental contamination. The analyses were: total carotenoids, condensed tannins, total phenolics, antioxidant activity, phenolic profile and paper sprayfingerprint. Mendez-Novelo; Germán Giacomán-Vallejos; Avel A. O. Maulana; Agoes Soehiani; Inge M. dos Reis; Wagner L. This paper presents a translation of this alternative table into the Portuguese language and an alignment discussion with a sustainable future. On the left, there is a representation of the region between the electrodes where the products of the cathodic and anodic reactions are released, and the insoluble metallic hydroxide is formed. de Lima Filho An adapted unmanned aerial vehicle used as a sampling analytical tool to fast and secure acquisition of waters samples for environmental purposes.
