

I'm not robot!

Lesson Activities: Students will solve a problem using only recycled material.

**Bellringer/lesson Starter:** Discuss the problem/question. What are possible solutions?

**Activities:** Students will use recycled material to solve the problem of how to keep a plant alive without having to water it every day. Students will begin by brainstorming, planning and creating multiple solutions, and then building actual working models.

**Materials:** 1. Recycled material, as much as possible. 2. Paper for planning and designing. 3. The problem (can be changed or adjusted depending on grade level)

**Wrap-up/Exit Slip:** Reflecting on the question, why was this model a better solution to the problem than your other ideas? Could you have created an even better solution?
